

10872NAT

Diploma of Equitation Science

Course Information, Fees & Charges

As of: 7/2020

10872NAT Diploma of Equitation Science

The Diploma of Equitation Science is a nationally recognised horse training course accredited with the Australian Skills Quality Authority (ASQA), a national authority which recognises Qualifications in the Vocational sector.

Target Market:

Horse riders who seek to improve their relationship with their horse, and their horse's performance. These riders are reflective and analytic, and have always felt they needed to understand the 'why' in horse training. They are interested in behaviour and are drawn to scientific practices and systematic approaches to training and riding.

Purpose of course

This course is intended to provide participants with a range of knowledge and skills to perform the functions associated with training horses, riders, handlers and coaches. Understanding how horses learn and behave is vital for anyone in the horse industry, as this evidenced-based knowledge will enhance all sectors of the equine industry including the following:

- Horse breaking and training
- Horse breeding
- Olympic and other equine disciplines
- Recreational
- Racing
- Agriculture

This objective and evidence-based approach to training horses is well documented in scientific literature and will enable horse trainers to use consistent methods when handling and riding horses. The most important part of such an approach lies in the fact that because animal training is the same process as animal learning, it's essential that horse people are trained to understand the horses' instinctive behaviours and learning processes. The implementation of this learning will lead to more predictable and calm horses, ensure a safer environment for horse handlers and improve horse welfare.

On completion of this course, students will have the knowledge and skills to train an untrained or an incorrectly trained horse. Also to understand, analyse and resolve behavioural issues shown by horses through the evidence-based approach provided by the science of behavioural psychology. Specifically, students will have the skills and knowledge to start their own horse training and instructing business, or apply for the following jobs/roles:

- Horse trainer
- Horse riding instructor
- Stable manager

Students will also have the skills and knowledge to assist in other areas of the equine industry such as:

- Behaviour assessments/consultations
- Pre-purchase assessments
- Veterinary
- Farriery
- Forensics (expert witness)

Course units:

Code	Title
NAT10872001	Develop a plan for horse training based on equitation science principles
NAT10872002	Train horses in-hand using the principles of learning
NAT10872003	Train horses under-saddle using the principles of learning
NAT10872004	Develop advanced skills for horse training
HLTAID003	Provide first aid
TAEDEL301	Provide work skill instruction
SISOEQU010	Identify hazards, assess and control safety risks for horse handling and riding activities
SISOEQU008	Instruct fundamental horse riding skills
SISOEQU009	Instruct the advancement of recreational horse riding skills

Course Structure

To be eligible for the award of 10872NAT Diploma of Equitation Science, learners must successfully complete a total of 9 units of competency comprising:

- 9 core units

Learners who do not successfully complete the required units for qualification will be issued with a Statement of Attainment for completed units.

Unit code	Unit title	Pre-requisite*	Nominal hours
Core units			
NAT10872001	Develop a plan for horse training based on equitation science principles	Nil	200
NAT10872002*	Train horses in-hand using the principles of learning	NAT10872001	250
NAT10872003*	Train horses under-saddle using the principles of learning	NAT10872001 NAT10872002	250
NAT10872004*	Develop advanced skills for horse training	NAT10872001 NAT10872002 NAT10872003	250
TAEDEL301	Provide work skill instruction	Nil	40
HLTAID003	Provide first aid	Nil	18
SISOEQU009*	Instruct the advancement of recreational horse riding skills	SISOEQU008 SISOEQU010	40
SISOEQU010	Identify hazards, assess and control safety risks for horse handling and riding activities	Nil	30
SISOEQU008	Instruct fundamental horse riding skills	Nil	60
Total nominal hours			1138

Duration

Supervised: 1138

Volume of learning

The Volume of Learning of a Diploma is typically 1 - 2 years and the Diploma of Equitation Science is consistent with the Volume of Learning in the AQF specification for the Diploma.

Non supervised activity will involve the student:

- Undertaking self-paced study,
- Undertaking activities such as web-searches,
- Undertaking observational activities and practically applying the theoretical knowledge,
- Practising with own horse, all training strategies, in-hand and under-saddle.
- Completing a 'log book' of practical training sessions in each unit.

Whilst this course is self-paced, there is a time frame for completion of each unit. Students can apply for extensions which will be judged case by case. Extensions and re-enrolments incur additional fees.

Completion timeframes:

ESI enrolls students on a semester basis. There are 3 semesters per year, and student can begin in any semester throughout the year. For current semester dates, [click here](#).

On enrolment students need to select their study load (full-time, part-time or semi-part time). Unit completion timeframes for each load as follows:

- **Full-time (EFTSL 0.75) 1.5 years**
 Complete one ESI unit and one additional unit per semester
Commitment: approximately 15-20 hours per week (including 2 practical sessions with your horse)
- **Part-time (EFTSL 0.5) 2 years**
 Complete one ESI unit per semester and complete the 4 additional units in the final semester.
Commitment: approximately 10-15 hours per week (including 1-2 practical sessions with your horse)
- **Semi-part time (EFTSL 0.2) up to 5 years**
 Complete one ESI units per year and the 4 additional in the final year
Commitment: approximately 1-3 hours per week (including 1 practical session with your horse)

Theoretical Training

All theory is delivered online via our Learning Management System (LMS). Students will need a desktop computer or laptop, and internet. The LMS can be accessed at any time, from anywhere.

Practical Training

NAT10872003 and NAT10872004 & HLTAID003 require students to attend a practical workshop (1-4 days). Practical training will be conducted at Equitation Science International's training centre in Victoria, Australia. You will be required to attend the facility with your horse, or hire a horse from ESI.

Practical training and assessments are also conducted internationally (Europe/UK, Canada/NZ), fees will apply.

Students from overseas and interstate may also have the option to train with an ESI Nominated Coach nearer to home. Contact ESI for coaches and locations.

Entry Requirements

The physical requirements for entry into this course are based on the demands placed on individuals who handle horses and undertake horse training, and are designed to ensure their safety, the safety of others and the safety of the horses in their care.

Entrants should have:

- A moderate level of physical stamina and strength
- A moderate level of agility and coordination
- The ability to ride a horse at walk, trot and canter
- To be able to ride with a balanced, independent seat at all four gaits
- Their own horse or a horse they can work with throughout their training.

Learners are best equipped to achieve the course outcomes in the 10872NAT Diploma of Equitation Science if they have as a minimum, language, literacy and numeracy skills that are equivalent to Level 4 of the Australian Core Skills Framework.

All Learners are required to complete a 'Pre-assessment' of their horse riding skills, which includes providing a Video – this way we can ensure that the course is suitable for you to enter and will provide the level of skills you require to complete the program. The Pre-assessment questions will be a self-assessment of your riding capabilities.

Language Literacy and Numeracy

Equitation Science International recognises that reading, writing, listening, speaking and understanding mathematical concepts and processes are integral skills required for work and are therefore an important component of training. As all students are individuals with different life experiences, literacy and numeracy skills. You must have a good understanding of the English language as course material is only available in English. You must be able to read, write and interpret documents as you will be required to complete assessment tasks such as short/long answer questions and the ability to complete forms.

As part of the enrolment process, the student are required to complete a language, literacy and numeracy (LLN) exercise which will be used to assess the LLN ability of the student. Some students may be referred on for special help as required.

If you have a Language Literacy or Numeracy concern that is affecting your training program, we encourage you to raise the matter directly with your Trainer.

10872NAT Diploma of Equitation Science

Unit Descriptions & Pre-requisites

ESI units:

NAT10872001 Develop a plan for horse training based on equitation science principles

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop a plan for horse training based on equitation science principles.

It requires the understanding and ability to utilise knowledge of equine ethology, biomechanics and learning principles.

NAT10872002 Train horses in-hand using the principles of learning

Unit Descriptor

This unit of competency describes the performance outcomes, skills and knowledge for handlers to train the horse in-hand. This unit focuses on the horse performing a range of responses from light aids, maintaining rhythm, line and head position, applying the knowledge from 001 Develop a plan horse training based on equitation science principles. This ultimately minimises risk around handling and working with horses as well as laying the foundations for under-saddle training.

NAT10872003 Train horses under-saddle using the principles of learning

Unit Descriptor

This unit of competency describes the performance outcomes, skills and knowledge for handlers to train the horse under-saddle. This unit focuses on a detailed range of responses and key concepts of learning theory including practical applications of the equitation science training scale studied in detail to develop the ten basic responses in the ridden horse. This unit will build on previous knowledge and skills from *002 Train Horses In-hand using the principles of learning*, applying these skills to the ridden horse.

NAT10872004 Develop advanced skills for horse training

Unit Descriptor

This unit of competency describes the performance outcomes, skills and knowledge to train, and re-train horses using learning theory. This unit has three sections covering training different equine tasks (such as jumping, working equitation obstacles and trick training), foundation training and further develops skills in horse training to retrain behaviour problems. It builds on *002 Train horses in-hand using the principles of learning*, and *003 Train horses under-saddle using the principles of learning*, developing skills for more advanced riding and handling. The correct application of this training can pave the way for future positive interactions between horses and people.

Imported Units of competency

HLTAID003 Provide first aid

Unit Descriptor

This unit describes the skills and knowledge required to provide a first aid response to a casualty. The unit applies to all workers who may be required to provide a first aid response in a range of situations, including community and workplace settings.

TAEDEL301 Provide work skill instruction

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to conduct individual and group instruction and demonstrate work skills, using existing learning resources in a safe and comfortable learning environment. The unit covers the skills and knowledge required to determine the success of both the training provided and one's own personal training performance. It emphasises the training as being driven by the work process and context.

SISOEQU010 Identify hazards, assess and control safety risks for horse handling and riding activities

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify hazards, assess associated safety risks, take measures to eliminate or control those risks and document all processes. It covers the processes necessary to manage the significant safety risks associated with horse handling, instructing, coaching, guiding and riding activities.

This unit applies to a range of organisations including those involved in equestrian sport, instructional and recreational riding programs. Risk assessments are usually completed by those responsible for the activity including instructors, coaches, guides, and trail bosses. They may complete risk assessments independently, in consultation with others or through a team effort.

SISOEQU008 Instruct fundamental horse riding skills

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to teach new and or inexperienced riders the fundamental skills of horse riding.

It requires the ability to plan, organise and deliver individual training sessions within an overall learning program designed to progressively develop participants' fundamental riding skills.

This unit applies to instructors and coaches who facilitate the acquisition of initial riding skills required by recreational and equestrian sport riders before they can progress to higher order skills required for work, recreational or competitive activities. To do this, instructors and coaches must be proficient horse riders.

Fundamental skills include, tacking and untacking the horse, mounting, use of reins, developing an independent seat, walking, trotting (including rising trot), cantering (including on the correct leads). Maintaining distance between horses, turning and riding lines and circles.

SISOEQU009 Instruct the advancement of recreational horse riding skills

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to teach moderately experienced riders who are seeking to advance their recreational riding skills.

It requires the ability to plan, organise and deliver individual training sessions within an overall learning program designed to progressively advance participants' riding skills.

This unit applies to instructors and coaches who facilitate skills acquisition for recreational riders. To do this, instructors and coaches must be proficient horse riders.

Advanced riding skills include, rider position, gaits, transitions, lateral and reverse movements. Control of the horse's pace, outline at walk, trot and canter. Also included is identifying common behavioural problems of horses in group rides and techniques to control adverse horse behaviour (while maintaining welfare of the horse and safety of rider).

Unique Student Identifier (USI) - What is a USI?

If you're studying nationally recognised training in Australia, you are required to have a Unique Student Identifier (USI).

You can create a USI online from your computer, tablet or smart phone anytime.
<http://www.usi.gov.au/students/Pages/dESIult.aspx>

Note – non-Australian students do not require a USI

Fees & Charges

ESI offers flexible payment options to students (pay in full or per unit of competency), as well as VET Student Loans for Australian students.

Enrolment Fees	Cost
10872NAT Diploma of Equitation Science (Full cost of course – all 9 units of competency)	\$8,900.00
NAT10872001 – Develop a plan for horse training based on equitation science principles	\$1,800.00
NAT10872002 – Train horses in-hand using the principles of learning	\$1,800.00
NAT10872003 – Train horses under-saddle using the principles of learning	\$1,800.00
NAT10872004 – Develop advanced skills for horse training	\$1,800.00
HLTAID003 – Provide first aid	\$100.00
TAEDEL301A – Provide work skill instruction	\$400.00
SISOEQU010 – Identify hazards, assess and control safety risks for horse handling and riding activities	\$400.00
SISOEQU008 – Instruct fundamental horse riding skills	\$400.00
SISOEQU009 – Instruct the advancement of recreational horse riding skills	\$400.00
Recognition of Prior Learning (RPL) / Credit Transfer <i>(Fees applicable upon application)</i>	
Additional Fees: Training Resources	
Equitation Science – textbook	\$79.99

VET Student Loans

Equitation Science International is an approved VET Student Loans provider. The VET Student Loans program (otherwise known as VSL) offers study loans to eligible students studying the Diploma of Equitation Science, repayable to the government once students reach the income threshold.

For more information on VET Student Loans, [click here](#) to view our VET Student Loans student information booklet.

Study assistance (Youth Allowance / Austudy / ABSTUDY)

Australian students studying the Diploma of Equitation Science may be eligible to access government payments. Students who access government assistance must study on a full-time basis (refer to page 6 for details). Check your eligibility for government assistance [here](#).

Enrolment procedure

Students can apply for the Diploma of Equitation Science at any time by simply emailing ESI for the forms and information. ESI requires the following forms and pre-assessments prior to enrolment:

- Enrolment form
- Pre-assessment: Horse Riding Assessment
- Pre-assessment: Language, Literacy & Numeracy assessment

Contact ESI for a copy of these forms, and any further information.
E. enrolments@esi-education.com
